Elektromarla since 1954 miniBar

THREE TECHNOLOGIES, ONE FACTORY

International example
100 rooms · 10 years

Which minibar costs less to own?

A 100-room hotel over 10 years: purchase price plus electricity, side by side. Every figure comes from the same calculation we run live at the stand.

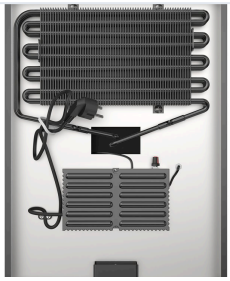

Absorption

Absolute silence and a compressor-free design. The price of that silence is energy.

Cooling performance	**Medium**
Noise level	**0 dB · completely silent**
Consumption	**0.9 kWh/day**
Electricity per year	**$6,570**
Price per unit	**$125**
Initial investment	**$12,500**

COST OF OWNERSHIP · 10 YEARS

$78,200

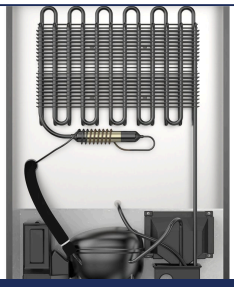

Thermoelectric (Peltier)

Compact, vibration-free and easy to use. Cooling performance is medium and drops as the room warms up.

Cooling performance	**Medium**
Noise level	**Silent · vibration-free**
Consumption	**0.275 kWh/day**
Electricity per year	**$2,008**
Price per unit	**$130**
Initial investment	**$13,000**

COST OF OWNERSHIP · 10 YEARS

$33,075

Inverter Compressor A+++

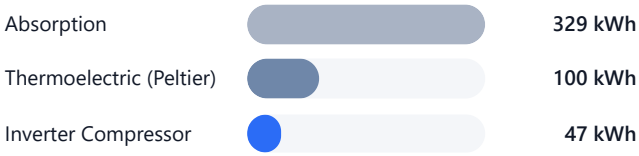

Powerful, efficient and fast cooling. A+++ efficiency; the compressor runs only as hard as needed.

Cooling performance	**Very high**
Noise level	**26–29 dB · quiet**
Consumption	**0.13 kWh/day**
Electricity per year	**$949**
Price per unit	**$180**
Initial investment	**$18,000**

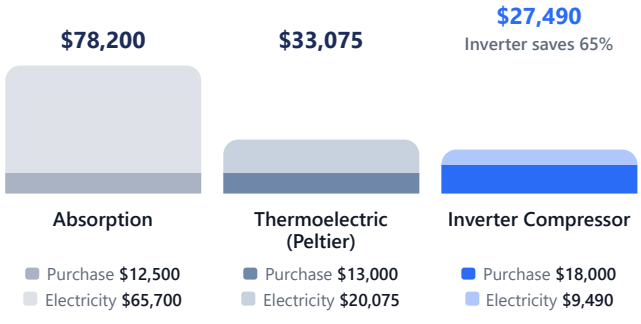

COST OF OWNERSHIP · 10 YEARS

$27,490

Electricity per minibar, per year

Total cost · 100 rooms · 10 years

Switching 100 rooms from Absorption to Inverter Compressor

Compared with Thermoelectric (Peltier): $1,059 a year, payback in 57 months.

$5,621
saved every year

12 months
payback of the higher price

$56,210
saved over 10 years

5+ YEARS OF OPERATION
Inverter Compressor: lowest running cost, pays back in a few seasons.

ABSOLUTE SILENCE REQUIRED
Absorption or Peltier: no compressor, nothing to hear at night.

BUDGET PROJECT, COOL CLIMATE
Peltier: lowest price of the silent options; cooling drops in warm rooms.

Elektromarla · +90 544 870 25 01 · info@elektromarla.com · www.elektromarla.com

Assumptions: 100 rooms · electricity at 0.20 USD/kWh (typical commercial tariff) · 365 days a year · 10 years horizon · unit prices in USD
Estimates for comparison only. Actual consumption varies with ambient temperature, door openings, load and settings. Tariffs and exchange rates are reference values, not live rates.
